cperryk

As a software leader with a decade of experience, I've worked across a wide variety of problem spaces and technologies, playing critical roles in high-profile projects. My passion is building innovative products and world-class engineering teams.

EXPERIENCE

Datadog Engineering Manager

June 2023 – Present | New York City | Full time

Leads the product engineering team responsible for Datadog's [incident management product](#)

Peloton Engineering Manager

Feb. 2021 – June 2023 | New York City | Full time

- Led a backend engineering team responsible for the content search and discovery experiences serving Peloton's 7 million members, balancing the interests of dozens of stakeholders from across the company, including partners in Product, Marketing, Production, and Engineering
- Trained, coached, mentored, and managed a distributed team of 14 direct reports ranging from junior to staff level, defining processes, policies, and support structures
- Oversaw a long-running effort to migrate hundreds of endpoints from a Python monolith to event-driven microservices fronted by a GraphQL gateway
- Led of a cross-functional project team of 15 engineers to deliver a suite of successful new features to improve the workout experience for Peloton members, such as [Movements and Body Activity](#)
- Established a standardized recruitment process for all backend teams, allowing them to hire quickly and effectively
- Drove significant improvements to the engineering onboarding experience, shortening the path to productivity for new hires across all product backend teams
- Successfully led a departmental effort to define team ownership over hundreds of resources, allowing Peloton to maintain operational excellence as it scaled

Lifion by ADP Lead Platform Engineer

2018 – 2021 | New York City | Full time

- As functional lead of a team of eight engineers responsible for Lifion's client management

- system, organized project work, set architectural direction, and worked closely with product stakeholders
- Mentored other engineers and gave technical presentations weekly
- Designed and implemented a new federated GraphQL API, backed by TypeScript microservices
- Reworked outdated domain models and systems with a focus on test-driven development, multi-paradigm programming, and domain-driven design
- Successfully led a team of developers to deliver a new data processing tool under a critical deadline

New York Magazine Senior Full-Stack Engineer

2016 – 2018 | New York City | Full time

- Spearheaded the full-stack engineering of The Cut's [homepage redesign](#), including the Node microservice that populates homepages with content based on editorial specifications
- Designed a dynamic client-side JavaScript dependency analysis and bundling system, shrinking response payloads on article pages up to 18 percent globally
- Contributed to the in-house, Vue-based content-management system and page editor
- Built [The Year in Memes](#), a National Magazine Award finalist

Slate.com

Lead News Apps Engineer

2012 – 2016 | New York City | Full time

- Built interactive visualizations, widgets, and games using Node and React
- Developed apps that told important stories about [gun violence](#), [dark money](#), and [gentrification](#)
- Produced some of Slate's most recognizable work, including the [Game of Thrones Graveyard](#) and the [Outrage Calendar](#), a National Magazine Award finalist
- Developed games, such as the [Gerrymander Jigsaw Puzzle](#) and the [Starbucks Quiz](#), as well

as a production platform for creating [audio](#) and [video](#) quizzes

- Built Slate's [Gun Deaths](#) project, featured on NPR, MSNBC, and *The Daily Show*
- Built a desktop email client and chronicled the project in a [long-form essay](#)
- Managed a junior engineer and three interns
- Broke Slate's all-time traffic record with the "[Travoltify Your Name](#)" generator

City University of New York
